Disability Status* by Year, Maine, 2008-2010

Year	Single Year Estimated n	%	90% Margin of Error
2008	206,563	15.9%	±0.5
2009	209,772	16.1%	±0.5
2010	198,362	15.1%	±0.5

Data Source: U.S. Census Bureau, American Community Survey. Data query from the American FactFinder: Table S1810 (http://factfinder2.census.gov/faces/nav/jsf/pages/wc_acs.xhtml, accessed 3/26/12).
* Among the noninstitutionalized civilian population. The survey includes questions about six types of difficulty: hearing,

* Among the noninstitutionalized civilian population. The survey includes questions about six types of difficulty: hearing, vision, cognitive, ambulatory, self-care, and independent living. "Disability status is determined from the answers from these six types of difficulty. For children under 5 years old, hearing and vision difficulty are used to determine disability status. For children between the ages of 5 and 14, disability status is determined from hearing, vision, cognitive, ambulatory, and self-care difficulties. For people aged 15 years and older, they are considered to have a disability if they have difficulty with any one of the six difficulty types." All percentages are weighted to be more representative of the population of Maine and to adjust for non-response. Note: New disability questions were introduced in the 2008 American Community Survey; comparisons of 2008 or later disability data with data from before 2008 are not recommended.
